Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. At issue is the Applicants' stipulation that the cyclic siloxane is present in the linear/branched siloxane starting material in an amount corresponding to 0.7 percent by weight or less. They allude to Production Example 1 as containing the support for this limitation but the Examiner submits that this passage only enables those linear/branched siloxanes for which the cyclic siloxane contribution is exactly 0.7 wt. percent. Indeed, though the intent to minimize cyclic siloxane content is clear, it has not been established that siloxane starting materials with a cyclic siloxane content beneath 0.7 wt. percent had ever been contemplated nor is evident that it is even possible to prepare a sample with cyclic siloxane content approaching 0 wt.% as the claim embraces.

As an aside, Applicant is encouraged to rewrite claim 1 so that the description of the preparation of the latex (A) precedes any mention of its subsequent use as a macromonomer.

The Examiner agrees that the prior art of record no longer applies in view of the claim amendments presented. Accordingly, the prior art rejections are all hereby withdrawn. Likewise, the doubling patenting rejections are also withdrawn.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
